

Pruter: High Road Protocol

A 4-day psycho-educational workshop, watching videos and doing structured activities teaching communication and problem solving skills.

The High Road workshop will quickly and gently recover the child's normal-range attachment bonding motivations within a matter of days (typically by the second or third day of the 4-day workshop).

High Road Protocol

Dr. Childress has reviewed the High Road protocol of and has observed its implementation in the workshop.

Dr. Childress understands how the High Road protocol achieves its success.

The High Road protocol is not a form of psychotherapy. It consists of watching psycho-educational videos and doing structured communication and problem-solving workshop activities.

Solution

Custody Resolution Method

Pruter: Custody Resolution Method

Data tagging of archival data (emails, texts, psychology reports, court declarations) that compiles documented data into meaningful categories.

Craig Childress, Psy.D.
Director of Psychological Services
CCPI; Custody Resolution Method

Solution

AB-PA Pilot Program for the
Family Courts

AB-PA Pilot Program for the Family Courts:

Program Direction: Children 4 Tomorrow

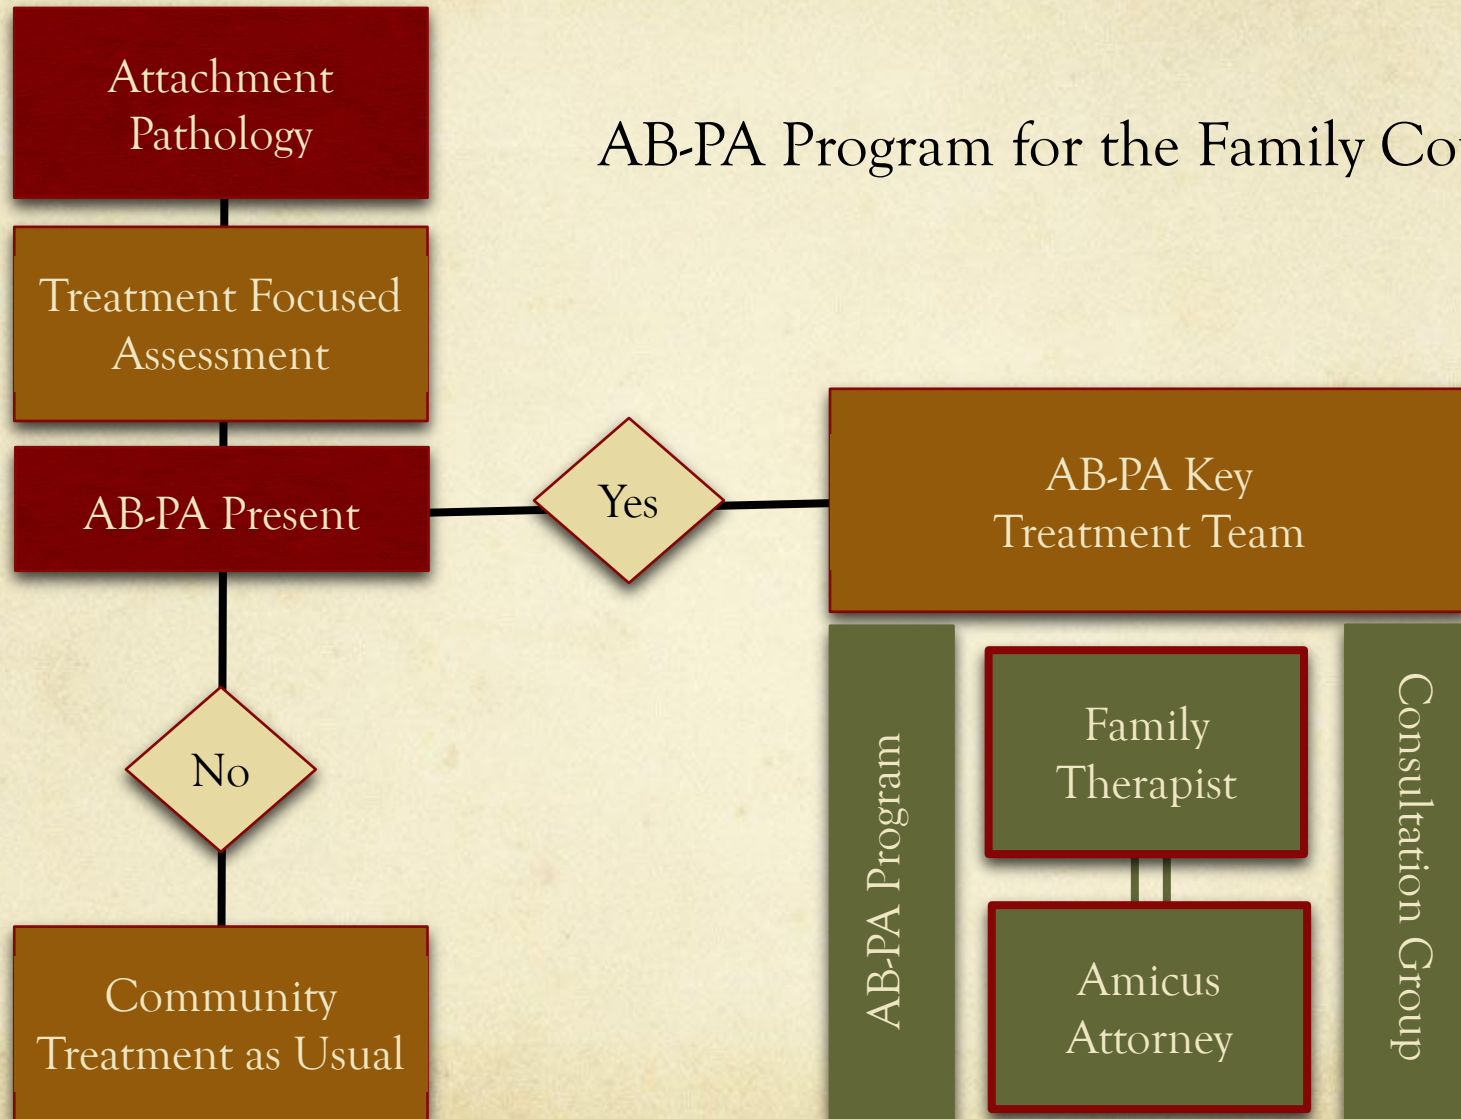

Program Director: Dwilene Lindsey

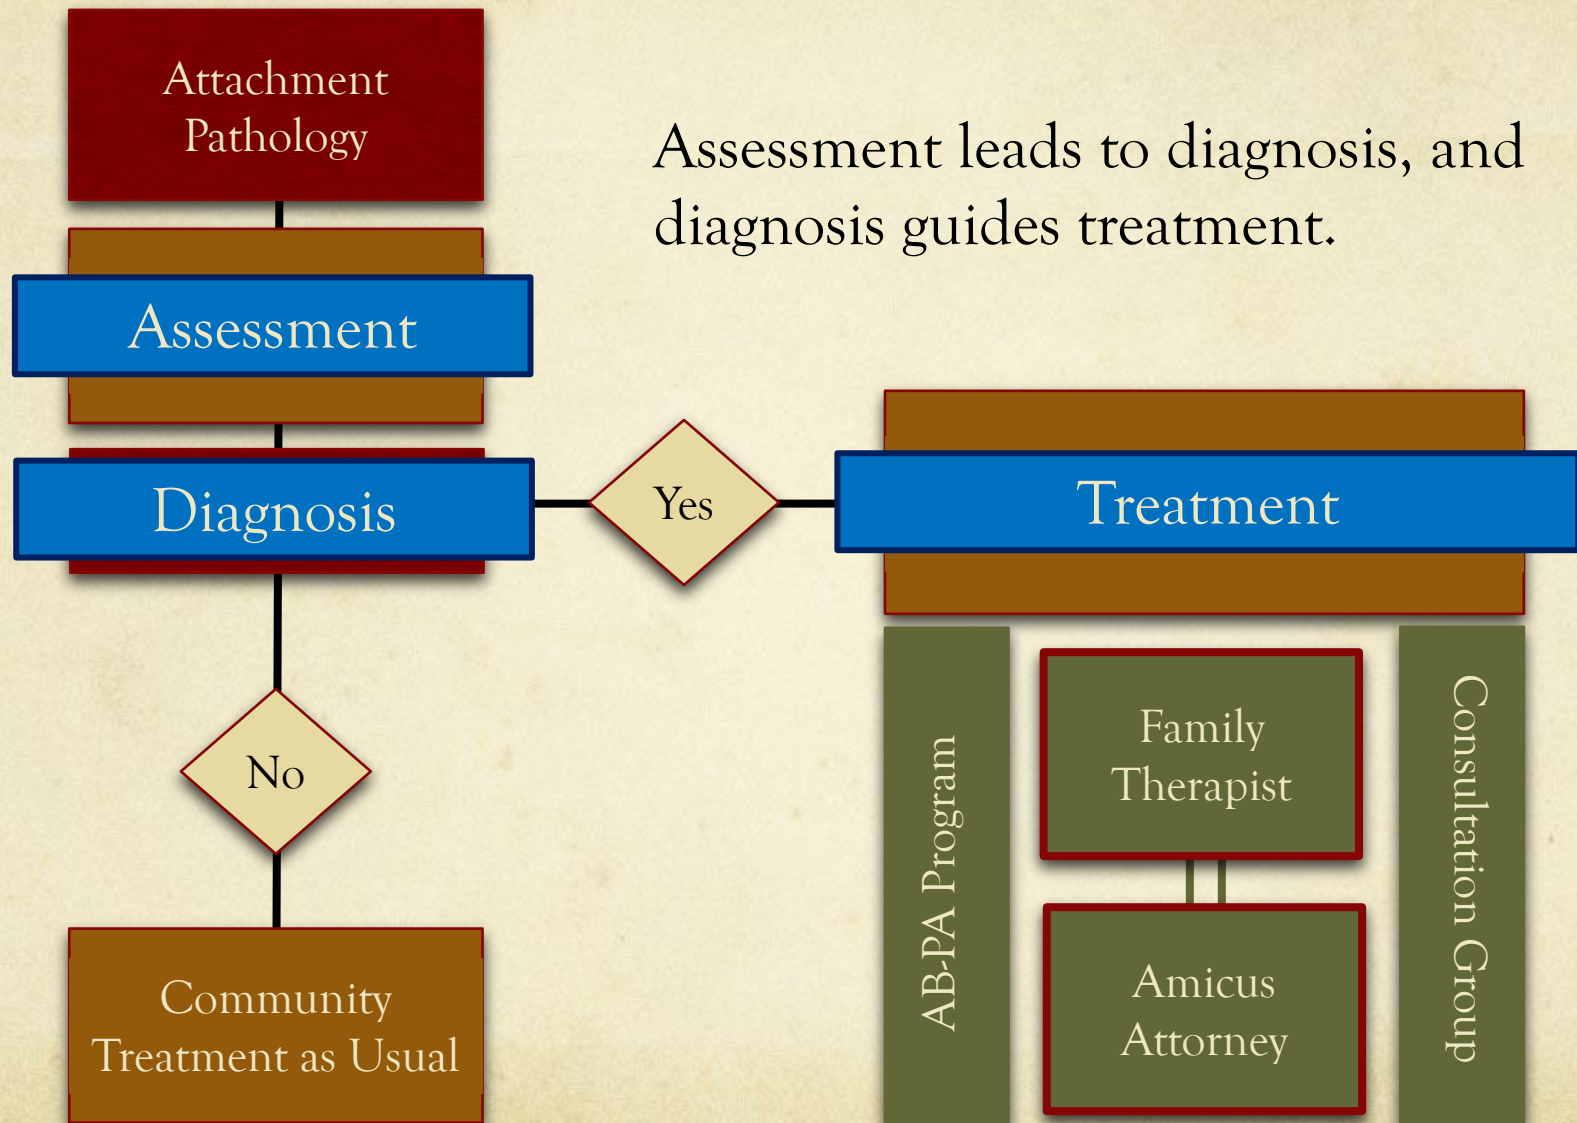

Clinical Director: Jayna Haney, MS

The goal of the Houston AB-PA pilot program for the family courts is to provide the court with the highest caliber of professional knowledge and standards of practice in clinical psychology.

The AB-PA pilot program in Houston represents the return of clinical psychology to court-involved consultation and -assessment with complex family conflict surrounding divorce.

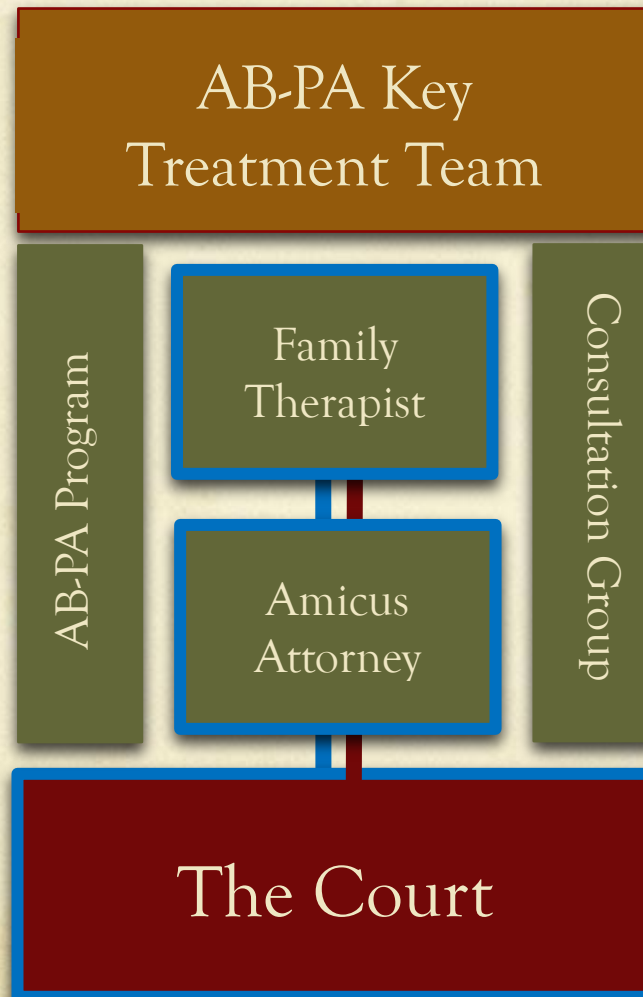

AB-PA Program for the Family Courts

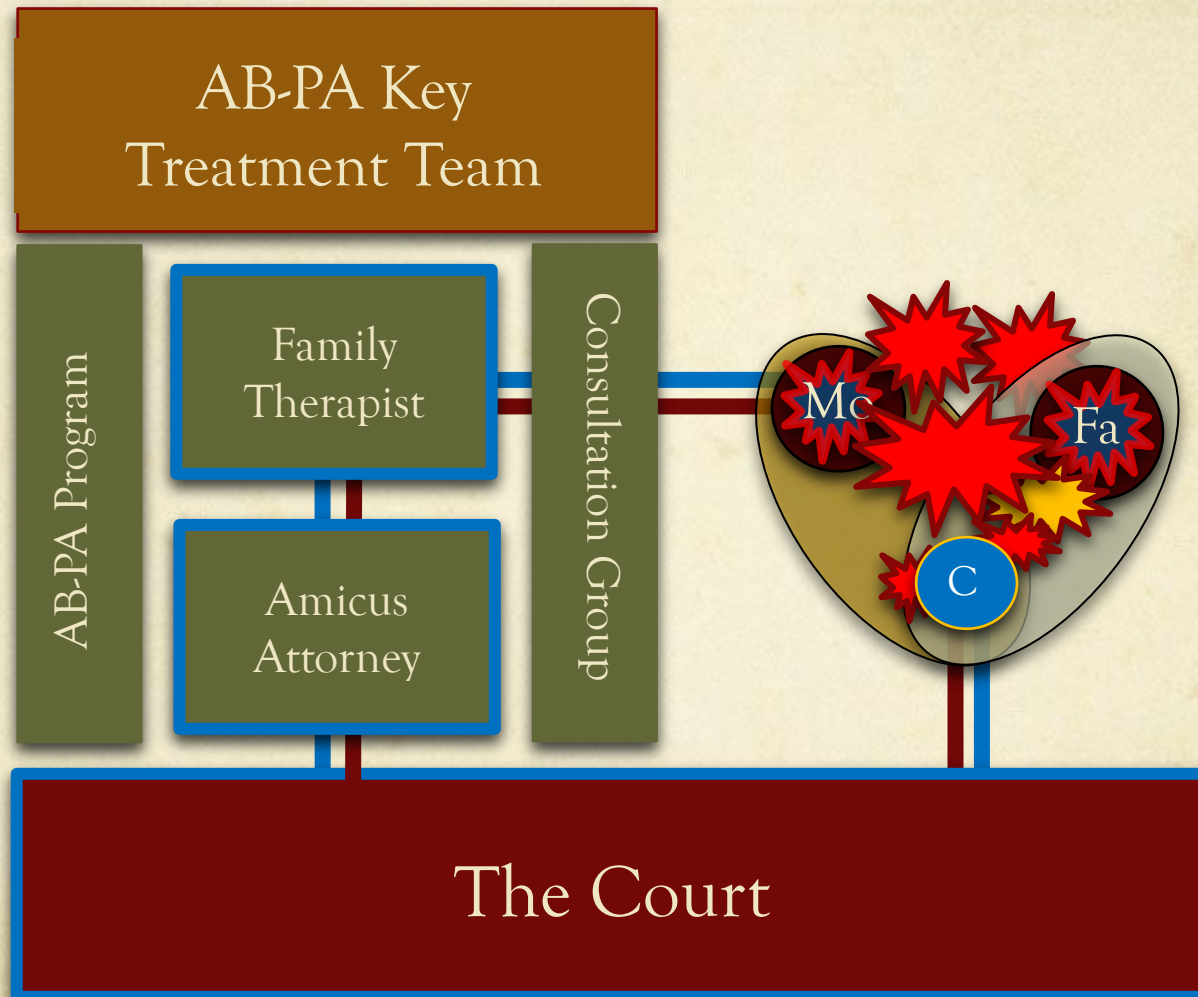

Assessment leads to diagnosis, and diagnosis guides treatment.

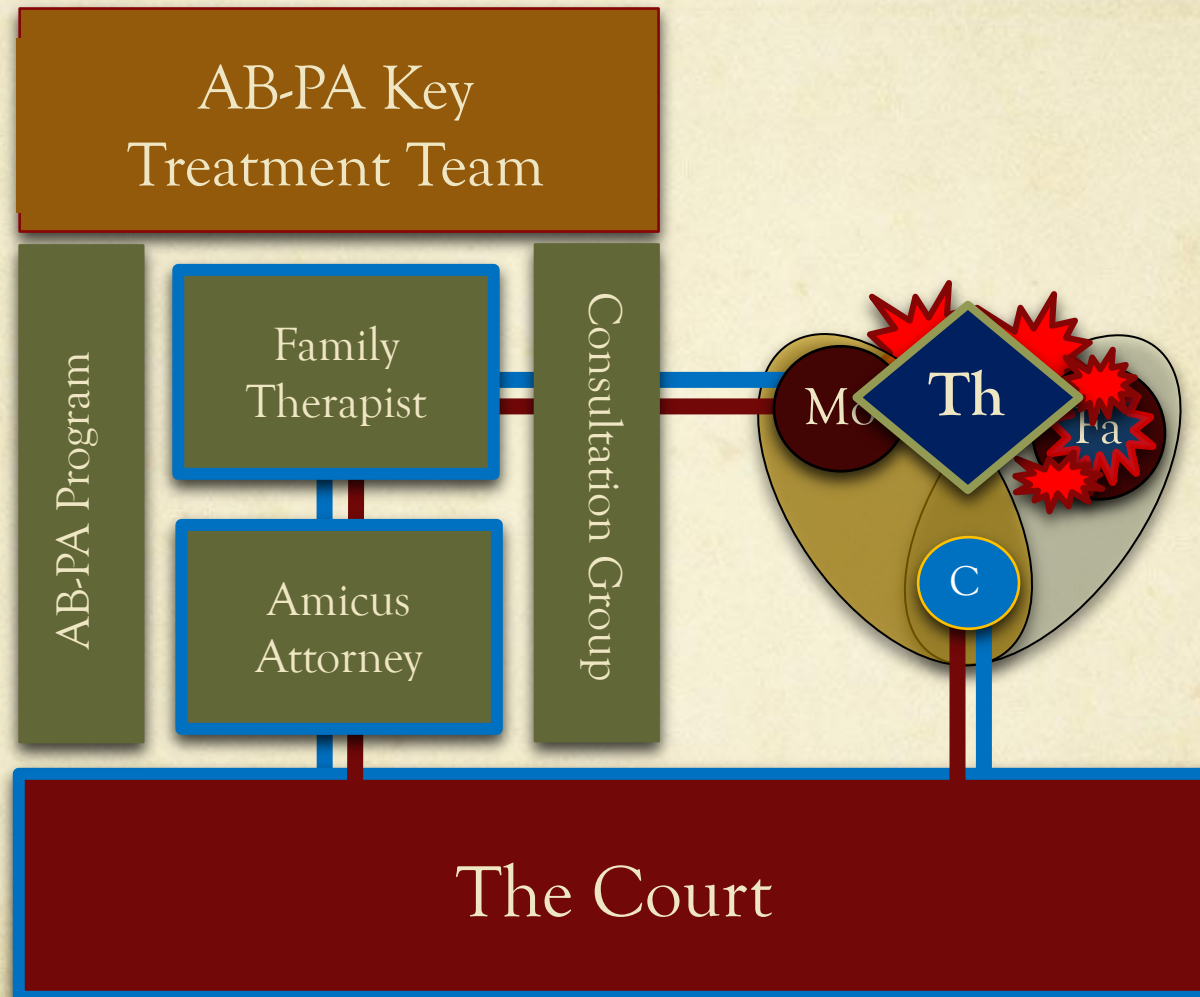

Collaboration with the Court

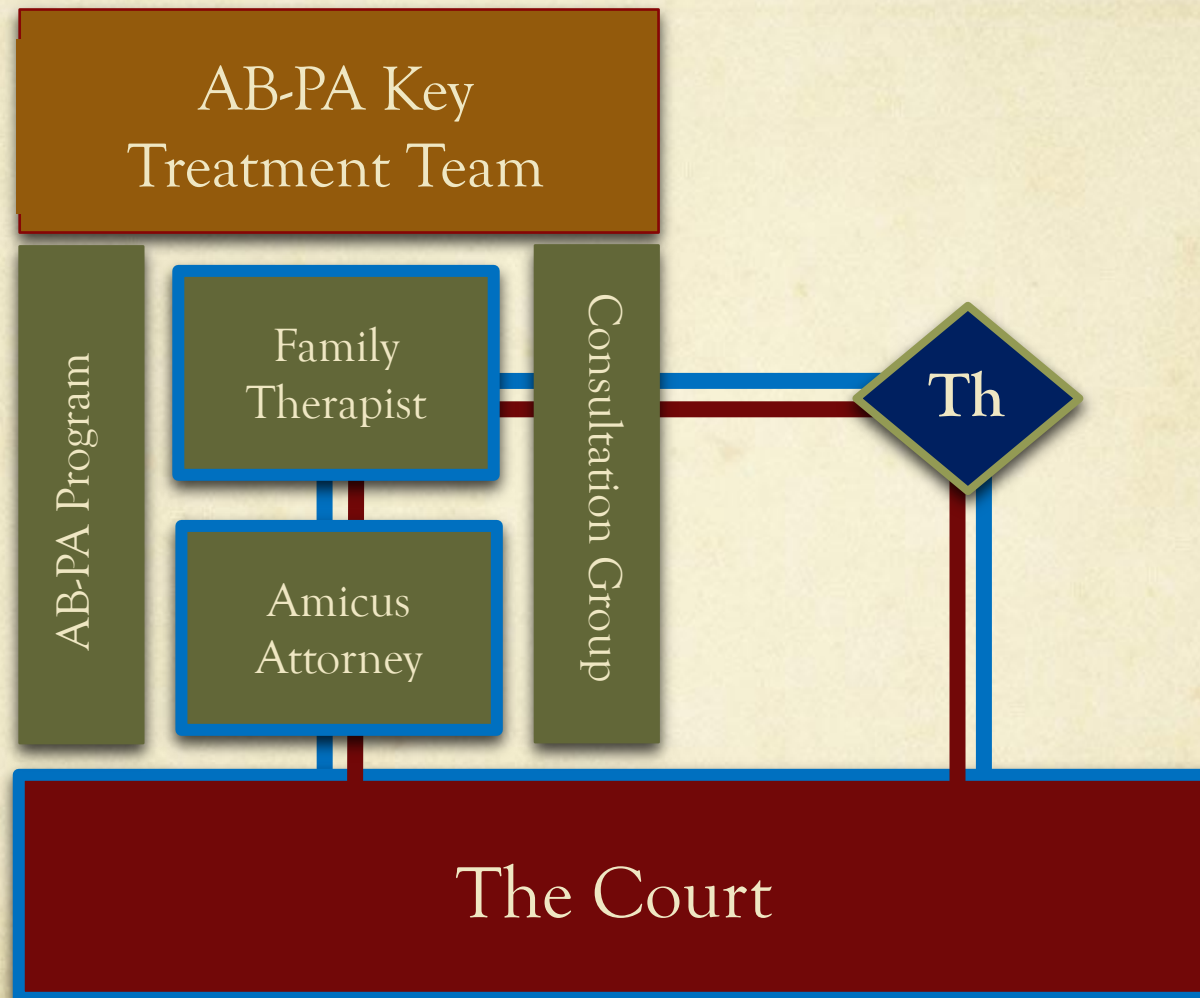

Integrating Treatment with Court Orders

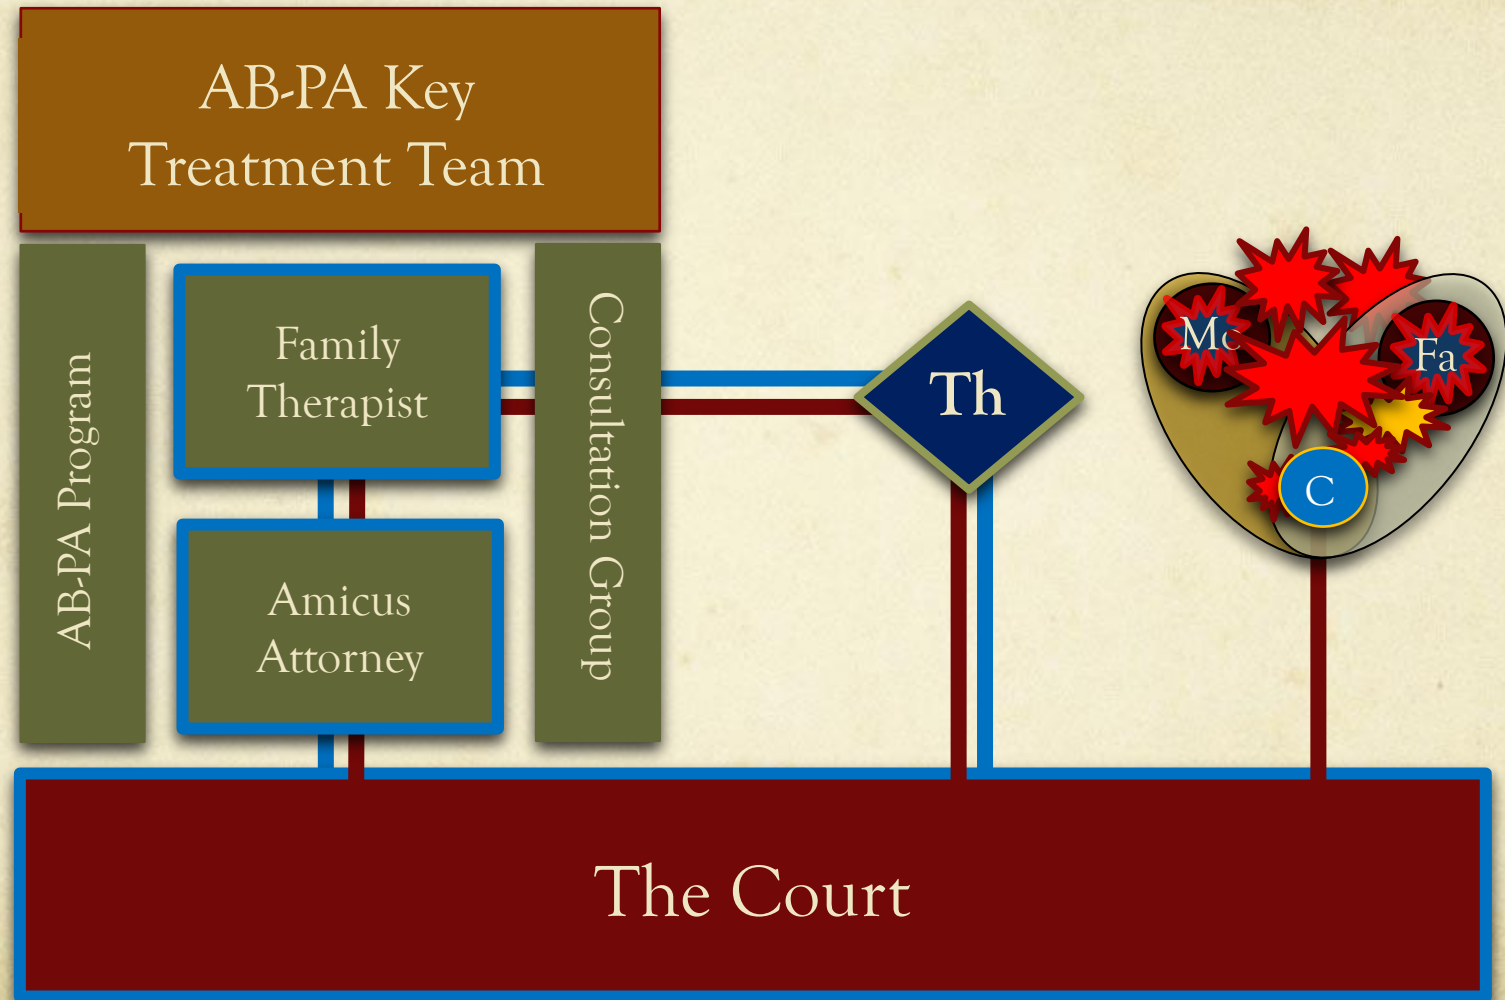

Stabilizing the High-Conflict Family
